

ARIYA AGUSTIAN RIYADHI

Backend Engineer at Jabar Digital Service

Bandung, West Java, Indonesia • +6282191987858 • ariyaagustian@gmail.com • [linkedin.com/in/ariyaagustian](https://www.linkedin.com/in/ariyaagustian)

I am a highly passionate developer with strong experience in both frontend and backend programming. Over the past few years, I've immersed myself in building modern web applications while integrating technical solutions with data-driven SEO and SEM strategies. I enjoy combining engineering precision with business needs to create efficient, scalable, and impactful digital products.

SKILL

Backend Development

- Python
- NodeJS
- Laravel
- Yii2
- Golang

Frontend Development

- Angular
- JQuery
- React
- Vue

Digital Marketing

- SEO (Search Engine Optimization)
- SEM (Search Engine Marketing)
- Data-Driven Marketing Strategy

PROFESSIONAL EXPERIENCE

Jabar Digital Service, Bandung • Backend Engineer

06/2023 - 12/2025

Project: New Classroom Dashboard & Monitoring Information System

- Designed **backend architecture** and **data workflows** for the Classroom Monitoring Information System (SIM-RKB).
- Built automated classroom needs **modeling, priority-scoring logic, and construction progress tracking**.
- **Developed ETL pipelines** integrating multi-source datasets (Disdik API, SIPANTAU, SPMB) with validation and cleaning.
- **Implemented PostGIS-based geospatial processing** for GeoJSON generation and spatial analytics.
- **Delivered secure RBAC**, audit logging, data versioning, and standardized public APIs.
- Managed **DevOps, including Docker, CI/CD (GitHub Actions)**, and automated SSL.

Technology: Python, PostgreSQL

Project: Jabar Form

- Developed **Jabar Form**, a customizable dynamic form builder similar to JotForm/Google Forms, designed to support advanced components and fully configurable business workflows.
- Built backend architecture supporting **complex form logic**, conditional validations, dynamic schemas, and multi-stage submission processes.

- Integrated the system with the **West Java data ecosystem**, enabling secure data exchange across multiple government platforms.
- Implemented **scalable APIs**, server-side processing, and optimized data storage for high-volume submissions.
- Collaborated closely with cross-functional teams to ensure compliance, reliability, and extensibility for government-grade applications.

Technology: Python, MongoDB

Salam Homecare, Bandung • Director of Information Technology

03/2021 - Present

- Developed and maintained **Salam Homecare**, a home healthcare service platform operating since 2021, enabling online booking, patient management, and service automation.
- Built backend features using **Laravel** and **MySQL**, including service scheduling, pricing logic, health record storage, and operational workflows.
- Implemented interactive UI components with **jQuery** and integrated external services to support real-time operations for nursing and IV drip services.
- Managed **WordPress-based landing pages**, optimizing structure and content for performance, conversion, and user experience.
- Executed **SEO strategies** (technical and content SEO) and managed **SEM campaigns** (Google Ads & Meta Ads) to increase traffic, lead quality, and customer acquisition.
- Introduced multiple **technology-driven innovations**, including automated WhatsApp booking flows, tracking with UTM parameters, analytics dashboards, and streamlined service delivery systems.

Technology: Laravel, JQuery, MySQL, Wordpress, SEO, SEM (Google Ads, Meta Ads)

PT Finansialku Solusi Indonesia, Bandung • Full Stack Developer

05/2021 - 05/2023

- Contributed to the development of **Finansialku**, a financial planning platform providing budgeting, expense tracking, and personalized financial advisory services for users across Indonesia.
- Designed and implemented multiple **financial planning calculators** (investment projection, retirement planning, emergency fund, debt payoff, insurance needs, goal-based planning, etc.) to support user decision-making with accurate, data-driven outputs.
- Developed backend modules using **Laravel** and **Yii2**, ensuring efficient request handling, secure data operations, and optimized performance.
- Integrated **MongoDB** for flexible data storage and retrieval, supporting analytical features and calculator result logging.
- Collaborated with financial planners to translate complex financial formulas into reliable, scalable backend logic.
- Ensured code quality, security compliance, and alignment with **OJK regulations** and **ISO 27001:2013** data security standards.

Technology: Laravel, Yii2, JQuery, MongoDB

Worked on multiple enterprise-level software projects across banking, healthcare, and e-commerce/domains

Project 1 — Internal Paper Forms & Administrative Workflow System (Banking Industry)

Tech: Laravel, jQuery, Kecak Workflow

- Developed an internal system to digitize paper forms and administrative processes for one of Indonesia's largest banks.
- Implemented core modules including Form Owner Maker/Approver, MIS Request, and Group Distribution.
- Built workflow logic using Kecak Workflow to automate multi-step approval processes.
- Provided regular progress reports, technical suggestions, and coordination with the Project Manager to ensure timely delivery.

Project 2 — Health Application Support Team (State-Owned Enterprise)

Tech: AngularJS, Angular 9

- Served as part of the support team for a national-scale health application owned by a state-owned company.
- Handled maintenance and feature improvements for key modules: Patient, Doctor, Provider, and CMS.
- Ensured stability, resolved bugs, and optimized UI/UX across multiple Angular versions.

Project 3 — Jewelry Marketplace Platform

Link : <https://whizliz.com>

Tech: Angular

- Developed multiple front-facing features for an online jewelry marketplace.
- Built essential e-commerce modules including Merchant Page, Login & Registration, Order Processing, Payment Gateway Integration, Wishlist, Cart, FAQs, My Profile, and product listing menus.
- Coordinated with the Project Manager for progress reporting, requirement refinement, and feature planning.

EDUCATIONS

Bachelor's Degree, Information System • Universitas Komputer Indonesia **2015 - 2019**

Computer and Network Engineering • SMK Negeri 4 Bandung **2012 - 2015**
